

King Abdullah Port Environmental Policy

King Abdullah Port is committed to protect and preserve port land within the Port area. The Port also recognizes that activities within the ports must be carried out in accordance with sound commercial practice.

King Abdullah Port will ensure compliance with health, safety and environmental laws, whilst taking corrective action when deficiencies are detected.

All development within the port is managed to optimize efficiency, while minimising the risk to and impact of that development on the port and their surrounding community and environment.

The Port will administer all dangerous goods legislation for the ports and will implement regulations diligently to achieve safe and efficient handling of cargo, with due regard to potential environmental sensitivity.

The Port minimizes the use of raw materials, toxic substances, energy, water and other resources and encourages other port users to adopt a similar policy.

King Abdullah Port maintains emergency procedures, response equipment and trained personnel to response to pollution related incidents. The Port requires that all incidents within the ports' boundaries be reported immediately by port users. The corporation's personnel are available 24 hours a day to respond to any incident.

The Port continues to develop training programs and exercises to maintain a high level of environmental, safety awareness and emergency preparedness.
